AUTHOR INDEX

Barbeyron, T., Mars, M., Schroeder, E., Malpièce, Y., Pluciennicza k, A., Beaud, G. and Streeck, R.E.
Identification of vaccinia promoters by heterologous expression of hepatitis B surface antigen in mouse cells infected by recombinant vaccinia viruses (910) 240

Beato, M.
Induction of transcription by steroid hormones (910) 95

Beaud, G., see Barbeyron, T. (910) 240

Beerman, T.A., see Woynarowski, J.M. (910) 149

Biswas, D.K., see Kumar, V. (910) 213

Bowden, G.T., see Yamanishi, D.T. (910) 34

Carotti, D., see Palitti, F. (910) 292

Chang, T. and Chang, W.-C.
Cloning and sequencing of a carp β_s-crystallin cDNA (910) 89

Chang, W.-C., see Chang, T. (910) 89

Chao, J. and Chao, L.
Identification and expression of kallikrein gene family in rat submandibular and prostate glands using monoclonal antibodies as specific probes (910) 233

Chao, L., see Chao, J. (910) 233

Chaves, M.E., see Tata, F. (910) 142

Chernin, M.I., Stevens, S.M., Kline, E.L. and Yardley, D.G.
An amylase gene from *Drosophila pseudoobscura* is expressed in *Escherichia coli* Functional selection and biochemical comparisons of the fly- and clone-produced amylases (910) 63

Cress, A.E., see Yamanishi, D.T. (910) 34

Drahovsky, D., see Palitti, F. (910) 292

Duschak, V.G. and Goldemberg, S.H.
Effects of DNA gyrase inhibitors in a polyamine-auxotrophic strain of *Escherichia coli* (910) 21

Endo, H., see Ichiyoshi, Y. (910) 43

Endo, H., see Tanuma, S.-i. (910) 197

Fanning, T.G. and Singer, M.F.
LINE-1: a mammalian transposable element (910) 203

Farber, F.E., see Hafner, J. (910) 72

Farber, F.E., see Hafner, J. (910) 85

Fischer, R., see Spiker, S. (910) 157

Fitt, P.S. and Sharma, N.
The fate of thymine-containing dimers in ultraviolet-irradiated *Halobacterium cutirubrum* (910) 103

Gawron, L.S., see Woynarowski, J.M. (910) 149

Goldemberg, S.H., see Duschak, V.G. (910) 21

Gore, J., see Kisilevsky, R. (910) 282

Gotoh, S., see Kubomura, S. (910) 171

Grünwald, S., see Palitti, F. (910) 292

Hafner, J., Mohammad, F. and Farber, F.E.
Alkaline nuclease activity in cells infected with herpes simplex virus type 1 (HSV-1) and HSV-1 temperature-sensitive mutants (910) 85

Hafner, J., Mohammad, F., MacDonald Green, D. and Farber, F.E.
In situ detection of alkaline nuclease activity in cells infected with herpes simplex virus type 1 (HSV-1) (910) 72

Hamburger, J., see Roguel, N. (910) 116

Helmstetter, C.E., see Munson, B.R. (910) 11

Higashi, K., see Kubomura, S. (910) 171

Hirano, H., see Kubomura, S. (910) 171

Hoefsloot, E.H., see Van der Horst, G.T.J. (910) 123

Hofer, B., Müller, D. and Köster, H.
Escherichia coli RNA polymerase binding to a DNA terminus prevents formation of a closed promoter complex (910) 254

Hopkins, R., see Spiker, S. (910) 157

Hucul, J.A., see Munson, B.R. (910) 11

Humphries, S.E., see Tata, F. (910) 142

Ichiyoshi, Y., Endo, H. and Yamamoto, M.
Length polymorphism in the 3′ noncoding region of rat hepatic α2u-globulin mRNAs (910) 43

Jerzmanowski, A. and Moraczewska, J.
A charged contaminant prevents *Physarum* chromatin from aggregating (910) 111

Jones, C. and Su, R.T.
Association of viral and plasmid DNA with the nuclear matrix during productive infection (910) 52

Kao, C.-Y., see Lang, D. (910) 271

Kapoor, R., see Lakhani, S. (910) 189

Karasaki, Y., see Kubomura, S. (910) 171

Kawashima, K., see Tanuma, S.-i. (910) 197

Kisilevsky, R. and Gore, J.
A comparison of accessibility of ribosomal proteins on free and membrane-bound ribosomes: the ribosomal proteins potentially involved in ribosome-membrane binding (910) 282

Kleinwächter, V., see Štros, M. (910) 163

Kline, E.L., see Chernin, M.I. (910) 63

Knippers, R., see Stahl, H. (910) 1
Köster, H., see Hofer, B. (910) 254
Kotler, M., see Roguel, N. (910) 116
Krajewski, C.A., see Munson, B.R. (910) 11
Kroos, M.A., see Van der Horst, G.T.J. (910) 123
Ktistakis, N.T., see Lang, D. (910) 271
Kubomura, S., Obara, M., Karasaki, Y., Taniguchi, H., Gotoh, S., Tsuda, T., Higashi, K., Ohsato, K. and Hirano, H.
Genetic analysis of the cell binding domain region of the chicken fibronectin gene (910) 171
Kumar, V., Wong, D.T.W., Pasion, S.G. and Biswas, D.K.
Defective distal regulatory element at the 5′ upstream of rat prolactin gene of steroid-nonresponsive GH-subclone (910) 213

Lakhani, S., Kapoor, R. and Sachar, R.C.
Modulation of poly(A)$^+$ RNA levels in fungal-infected wheat embryos through the selective inactivation of RNA polymerase II and poly(A) polymerase (910) 189
Lang, D., Steely, Jr., H.T., Kao, C.-Y. and Ktistakis, N.T.
Length, mass, and denaturation of double-stranded RNA molecules compared with DNA (910) 271

MacDonald Green, D., see Hafner, J. (910) 72
McIntyre, N., see Tata, F. (910) 142
Maier, P.G., see Munson, B.R. (910) 11
Malpièce, Y., see Barbeyron, T. (910) 240
Markham, A.F., see Tata, F. (910) 142
Mars, M., see Barbeyron, T. (910) 240
Mohammad, F., see Hafner, J. (910) 72
Mohammad, F., see Hafner, J. (910) 85
Moraczewska, J., see Jerzmanowski, A. (910) 111
Moskowitz, H., see Roguel, N. (910) 116
Müller, D., see Hofer, B. (910) 254
Munson, B.R., Hucul, J.A., Maier, P.G., Krajewski, C.A. and Helmstetter, C.E.
E. coli minichromosome replication in vitro and in vivo: comparative analyses of replication intermediates (910) 11

Nilsson, L., see Nygård, O. (910) 245
Nussinov, R.
(A)GGG(A), (A)CCC(A) and other potential 3′ splice signals in primate nuclear pre-mRNA sequences (910) 261
Nygård, O., Nilsson, L. and Westermann, P.
Characterisation of the ribosomal binding site for eukaryotic elongation factor 2 by chemical cross-linking (910) 245

Obara, M., see Kubomura, S. (910) 171
Ohsato, K., see Kubomura, S. (910) 171
Orkin, S.H., see Wojchowski, D.M. (910) 224
Osumi-Davis, P.A., Woody, A.-Y.M. and Woody, R.W.
Transcription initiation by *Escherichia coli* RNA polymerase at the gene II promoter of M13 phage: stability of ternary complex, direct photocrosslinking to nascent RNA, and retention of σ subunit (910) 130

Palitti, F., Carotti, D., Grünwald, S., Rispoli, M., Whitehead, E.P., Salerno, C., Strom, R. and Drahovsky, D.
Inactivation of de novo DNA methyltransferase activity by high concentrations of double-stranded DNA (910) 292
Parnaik, V.K.
DNAase-I-hypersensitive sites in the mouse albumin gene (910) 27
Pasion, S.G., see Kumar, V. (910) 213
Plucienniczak, A., see Barbeyron, T. (910) 240

Quatrano, R.S., see Spiker, S. (910) 157

Relevy, H., see Roguel, N. (910) 116
Reuser, A.J.J., see Van der Horst, G.T.J. (910) 123
Rispoli, M., see Palitti, F. (910) 292
Roguel, N., Moskowitz, H., Relevy, H., Hamburger, J. and Kotler, M.
The methylation state of the proviruses in avian sarcoma virus transformed chick and rat cells (910) 116

Sachar, R.C., see Lakhani, S. (910) 189
Salerno, C., see Palitti, F. (910) 292
Schroeder, E., see Barbeyron, T. (910) 240
Scrace, G.D., see Tata, F. (910) 142
Sharma, N., see Fitt, P.S. (910) 103
Simmen, F.A.
Expression of the avian c-erb B (EGF receptor) proto-oncogene during estrogen-promoted oviduct growth (910) 182
Singer, M.F., see Fanning, T.G. (910) 203
Spiker, S., Hopkins, R., Fischer, R. and Quatrano, R.S.
Synthesis of nucleosomal histone variants during wheat grain development (910) 157
Stahl, H. and Knippers, R.
The simian virus 40 large tumor antigen (910) 1
Steely, Jr., H.T., see Lang, D. (910) 271
Stevens, S.M., see Chernin, M.I. (910) 63
Streeck, R.E., see Barbeyron, T. (910) 240
Strom, R., see Palitti, F. (910) 292
Štros, M. and Kleinwächter, V.
Thermal denaturation and fluorescence study of nucleosomes containing non-histone chromosomal protein HMG2 (910) 163
Su, R.T., see Jones, C. (910) 52
Sytkowski, A.J., see Wojchowski, D.M. (910) 224

Taniguchi, H., see Kubomura, S. (910) 171
Tanuma, S.-i., Kawashima, K. and Endo, H.
Evidence of a regulatory role of the level of poly (ADP-ribose) in chromosomal proteins in metallothionein gene expression by glucocorticoids but not by heavy metals (910) 197
Tata, F., Chaves, M.E., Markham, A.F., Scrace, G.D., Waterfield, M.D., McIntyre, N., Williamson, R. and Humphries, S.E.
The isolation and characterisation of cDNA and genomic clones for human lecithin : cholesterol acyltransferase (910) 142
Tsuda, T., see Kubomura, S. (910) 171

Van der Horst, G.T.J., Hoefsloot, E.H., Kroos, M.A. and Reuser, A.J.J.
Cell-free translation of human lysosomal α-glucosidase: evidence for reduced precursor synthesis in an adult patient with glycogenosis type II (910) 123

Waterfield, M.D., see Tata, F. (910) 142
Westermann, P., see Nygård, O. (910) 245
Whitehead, E.P., see Palitti, F. (910) 292
Williamson, R., see Tata, F. (910) 142
Wojchowski, D.M., Orkin, S.H. and Sytkowski, A.J.
Active human erythropoietin expressed in insect cells using a baculovirus vector: a role for N-linked oligosaccharide (910) 224
Wong, D.T.W., see Kumar, V. (910) 213
Woody, A.-Y.M., see Osumi-Davis, P.A. (910) 130
Woody, R.W., see Osumi-Davis, P.A. (910) 130
Woynarowski, J.M., Gawron, L.S. and Beerman, T.A.
Bleomycin-induced aggregation of presolubilized and nuclear chromatin from L1210 cells (910) 149

Yamamoto, M., see Ichiyoshi, Y. (910) 43
Yamanishi, D.T., Bowden, G.T. and Cress, A.E.
An analysis of DNA replication in synchronized CHO cells treated with benzo[*a*]pyrene diol epoxide (910) 34
Yardley, D.G., see Chernin, M.I. (910) 63
